Zhang, G.
—, Hattori, H. and Tanabe, K.
Aldol addition of acetone, catalyzed by solid base catalysts: magnesium oxide, calcium oxide, strontium oxide, barium oxide, lanthanum (III) oxide and zirconium oxide 189

Subject Index

Adsorption
Spectroscopic study of the vanadium–phosphate catalyst used in the selective oxidation of n-butane to maleic anhydride 119

Adsorption
Effects of support on carbon formation and gasification on nickel during carbon monoxide hydrogenation 147

Adsorption
Microcalorimetric investigation of the interaction of carbon monoxide with coprecipitated cupric oxide–zinc oxide catalysts in well-defined oxidation states 287

Adsorption
Comparative calorimetric studies of the acidity of zeolites by static and temperature-programmed methods of ammonia adsorption and desorption 323

Ageing
Synthesis of methanol. Part 1. Catalysts and kinetics 1

Ageing
Effects of support on carbon formation and gasification on nickel during carbon monoxide hydrogenation 147

Ageing
Investigation of nickel oxide on alumina aerogel catalysts promoted with magnesia or iron oxide for nitroxidation of propylene into acrylo- and acetonitriles 209

Ageing
Deactivation by coking of platinum/alumina catalysts. Effects of operating temperature and pressure 277

Ageing
Transformation of C_1–C_4 alcohols into hydrocarbons on an amorphous silica–alumina catalyst 299

Alcohols
Transformation of C_1–C_4 alcohols into hydrocarbons on an amorphous silica–alumina catalyst 299

Aldol condensation
Aldol addition of acetone, catalyzed by solid base catalysts: magnesium oxide, calcium oxide, strontium oxide, barium oxide, lanthanum (III) oxide and zirconium oxide 189

Aldol condensation
Vapor-phase aldol condensation of formaldehyde with propionic acid on vanadium pentoxide–phosphorus pentoxide 221

Alkaline earth oxides
Aldol addition of acetone, catalyzed by solid base catalysts: magnesium oxide, calcium oxide, strontium oxide, barium oxide, lanthanum (III) oxide and zirconium oxide 189

Ammonia adsorption
Comparative calorimetric studies of the acidity of zeolites by static and temperature-programmed methods of ammonia adsorption and desorption 323

Barium oxide
Aldol addition of acetone, catalyzed by solid base catalysts: magnesium oxide, calcium oxide, strontium oxide, barium oxide, lanthanum (III) oxide and zirconium oxide 189

Benzene oxidation
Kinetics and selectivity of deep catalytic oxidation of n-hexane and benzene 231

Butane oxidation
Spectroscopic study of the vanadium–phosphate catalyst used in the selective oxidation of n-butane to maleic anhydride 119

Butene hydrogenation
Hydrogenation of but-1-yne and but-1-ene on palladium catalysts. Particle size effect 307

Butyne hydrogenation
Hydrogenation of but-1-yne and but-1-ene on palladium catalysts. Particle size effect 307

Calcium oxide
Aldol addition of acetone, catalyzed by solid base catalysts: magnesium oxide, calcium oxide, strontium oxide, barium oxide, lanthanum (III) oxide and zirconium oxide 189

Carbon monoxide hydrogenation

Chrysocolla as a methanation catalyst support 95
Carbon monoxide hydrogenation
Effects of support on carbon formation and gasification on nickel during carbon monoxide hydrogenation 147
Carbon monoxide hydrogenation
Effect of catalyst preparation on catalytic activity. V. Chemical structures on nickel/alumina catalysts 163
Carbon monoxide hydrogenation
Effect of catalyst preparation on catalytic activity. VI. Chemical structures on nickel/alumina catalysts: their impact on the rate-determining step in the hydrogenation of carbon monoxide 177
Carbon monoxide hydrogenation
Effect of carbon deposits on carbon monoxide hydrogenation over alumina-supported cobalt catalyst, 199
Catalyst characterization
Chrysocolla as a methanation catalyst support 95
Catalyst characterization
Optimum chlorine content on a commercially operated $Pt–Re/Al_2O_3–Cl$ catalyst as a function of the specific surface area 109
Catalyst characterization
Spectroscopic study of the vanadium-phosphate catalyst used in the selective oxidation of n-butane to maleic anhydride 119
Catalyst characterization
Effect of the catalyst preparation on catalytic activity. V. Chemical structures on nickel/alumina catalysts 163
Catalyst characterization
Effect of carbon deposits on carbon monoxide hydrogenation over alumina-supported cobalt catalyst 199
Catalyst characterization
Investigation of nickel oxide on alumina aerogel catalysts promoted with magnesia or iron oxide for nitroxidation of propylene into acrylo- and acetonitriles 209
Catalyst characterization
Control of the porous structure of amorphous silica–alumina. V. The effect of compaction 249
Catalyst characterization
Microcalorimetric investigation of the interaction of carbon monoxide with coprecipitated cupric oxide–zinc oxide catalysts in well-defined oxidation states 287
Catalyst characterization
Hydrogenation of but-1-yne and but-1-ene on palladium catalysts. Particle size effect 307
Catalyst characterization
Comparative calorimetric studies of the acidity of zeolites by static and temperature-programmed methods of ammonia adsorption and desorption 323
Catalyst preparation
Synthesis of methanol. Part 1. Catalysts and kinetics 1
Catalyst preparation
Conversion of propan-2-ol on silica supported chromium oxide. II. Catalytic results 81
Catalyst preparation
Chrysocolla as a methanation catalyst support 95
Catalyst preparation
Effect of catalyst preparation on catalytic activity. V. Chemical structures on nickel/alumina catalysts 163
Catalyst preparation
Effect of catalyst preparation on catalytic activity. VI. Chemical structures on nickel/alumina catalysts: their impact on the rate-determining step in the hydrogenation of carbon monoxide 177
Catalyst preparation
Control of the porous structure of amorphous silica–alumina. V. The effect of compation 249
Catalyst preparation
Role of sulphur in catalytic reforming of hydrocarbons on platinum/alumina 259
Chromium oxide/silica
Conversion of propan-2-ol on silica supported chromium oxide. II. Catalytic results 81
Chrysocolla
Chrysocolla as a methanation catalyst support 95
Cobalt/alumina
Effect of carbon deposits on carbon monoxide hydrogenation over alumina-supported cobalt catalyst 199

Coke formation
Optimum chlorine content on a commercially operated Pt–Re/Al_2O_3–Cl catalyst as a function of the specific surface area 109
Coke formation
Effect of carbon deposits on carbon monoxide hydrogenation over alumina-supported cobalt catalyst 199
Coke formation
Investigation of nickel oxide on alumina aerogel catalysts promoted with magnesia or iron oxide for nitroxidation of propylene into acrylo- and acetonitriles 209
Coke formation
Role of sulphur in catalytic reforming of hydrocarbons on platinum/alumina 259
Coke formation
Deactivation by coking of platinum/alumina catalysts. Effects of operating temperature and pressure 277
Coke formation
Transformation of C_1–C_4 alcohols into hydrocarbons on an amorphous silica–alumina catalyst 299
Compaction
Control of the porous structure of amorphous silica–alumina. V. The effect of compaction 249
Copper
Synthesis of methanol. Part 1. Catalysts and kinetics 1
Copper(I) oxide/zinc oxide
Microcalorimetric investigation of the interaction of carbon monoxide with coprecipitated cupric oxide–zinc oxide catalysts in well-defined oxidation states 287
Copper(II) oxide/zinc oxide
Microcalorimetric investigation of the interaction of carbon monoxide with coprecipitated cupric oxide–zinc oxide catalysts in well-defined oxidation states 287
Copper/zinc oxide
Microcalorimetric investigation of the interaction of carbon monoxide with coprecipitated cupric oxide–zinc oxide catalysts in well-defined oxidation states 287

Deactivation
Activity and deactivation of a catalyst for vinyl acetate synthesis in an industrial fluidized reactor 67
Dehydrocyclization
Dehydrocyclization controlling site in bifunctional reforming catalysts 331
Dehydrocyclization
Dehydrocyclization controlling site in bifunctional reforming catalysts 337

Fluidized reactors
Activity and deactivation of a catalyst for vinyl acetate synthesis in an industrial fluidized reactor 67
Fluorinated mordenite
Partial oxidation of methane catalyzed by H-mordenite and fluorinated mordenite 139

Heteropolyoxometalates
Liquid phase isomerization of C_6–C_8 alkenes on heteropolyoxometalates 127
Hexane oxidation
Kinetics and selectivity of deep catalytic oxidation of n-hexane and benzene 231
Hydrocarbon reforming
Role of sulphur in catalytic reforming of hydrocarbons on platinum/alumina 259
Hydrogenation
Chrysocolla as a methanation catalyst support 95
Hydrogenation
Effects of support on carbon formation and gasification on nickel during carbon monoxide hydrogenation 147

Isomerization
Liquid phase isomerization of C_6–C_8 alkenes on heteropolyoxometalates 127

Kinetics
Synthesis of methanol. Part 1. Catalysts and kinetics 1
Kinetics
Conversion of propan-2-ol on silica supported chromium oxide. II. Catalytic results 81
Kinetics
Chrysocolla as a methanation catalyst support 95
Kinetics
Effect of catalyst preparation on catalytic

activity. V. Chemical structures on nickel/alumina catalysts 163
Kinetics
Effect of catalyst preparation on catalytic activity. VI. Chemical structures on nickel/alumina catalysts: their impact on the rate-determining step in the hydrogenation of carbon monoxide 117
Kinetics
Kinetics and selectivity of deep catalytic oxidation of n-hexane and benzene 231
Kinetics
Microcalorimetric investigation of the interaction of carbon monoxide with coprecipitated cupric oxide–zinc oxide catalysts in well-defined oxidation states 287
Kinetics
Hydrogenation of but-1-yne and but-1-ene on palladium catalysts. Particle size effect 307

Lanthanum (III) oxide
Aldol addition of acetone, catalyzed by solid base catalysts: magnesium oxide, calcium oxide, strontium oxide, barium oxide, lanthanum (III) oxide and zirconium oxide 189
Liquid phase isomerization
Liquid phase isomerization of C_6–C_8 alkenes on heteropolyoxometalates 127

Magnesium oxide
Aldol addition of acetone, catalyzed by solid base catalysts: magnesium oxide, calcium oxide, strontium oxide, barium oxide, lanthanum (III) oxide and zirconium oxide 189
Methacrylic acid
Vapor-phase aldol condensation of formaldehyde with propionic acid on vanadium pentoxide–phosphorus pentoxide 221
Methane oxidation
Partial oxidation of methane catalyzed by H-mordenite and fluorinated mordenite 139
Methanol synthesis
Synthesis of methanol. Part 1. Catalysts and kinetics 1
Mordenite
Partial oxidation of methane catalyzed by H-mordenite and fluorinated mordenite 139

Naphta reforming
Optimum chlorine content on a commercially operated Pt–Re/Al_2O_3–Cl catalyst as a function of the specific surface area 109
Naphta reforming
Dehydrocyclization controlling site in bifunctional reforming catalysts 331
Naphta reforming
Dehydrocyclization controlling site in bifunctional reforming catalysts 337
Nickel
Effects of support on carbon formation and gasification on nickel during carbon monoxide hydrogenation 147
Nickel oxide/alumina
Investigation of nickel oxide on alumina aerogel catalysts promoted with magnesia or iron oxide for nitroxidation of propylene into acrylo- and acetonitriles 209
Nickel/alumina
Effects of support on carbon formation and gasification on nickel during carbon monoxide hydrogenation 147
Nickel/alumina
Effect of catalyst preparation on catalytic activity. V. Chemical structures on nickel/alumina catalysts 163
Nickel/alumina
Effect of catalyst preparation on catalytic activity. VI. Chemical structures on nickel/alumina catalysts: their impact on the rate-determining step in the hydrogenation of carbon monoxide 177
Nickel/chrysocolla
Chrysocolla as a methanation catalyst support 95
Nickel/silica
Effects of support on carbon formation and gasification on nickel during carbon monoxide hydrogenation 147
Nickel/titania
Effects of support on carbon formation and gasification on nickel during carbon monoxide hydrogenation 147
Nitroxidation
Investigation of nickel oxide on alumina aerogel catalysts promoted with magnesia or iron oxide for nitroxidation of propylene into acrylo- and acetonitriles 209

Palladium

Synthesis of methanol. Part 1. Catalyst and kinetics 1
Palladium/alumina
Hydrogenation of but-1-yne and but-1-ene on palladium catalysts. Particle size effect 307
Particle size effect
Hydrogenation of but-1-yne and but-1-ene on palladium catalysts. Particle size effect 307
Platinum–nickel oxide/alumina
Kinetics and selectivity of deep catalytic oxidation of n-hexane and benzene 231
Platinum–rhenium/alumina–chlorine
Optimum chlorine content on a commercially operated $Pt–Re/Al_2O_3–Cl$ catalyst as a function of the specific surface area 109
Platinum/alumina
Deactivation by coking of platinum/alumina catalysts. Effects of operating temperature and pressure 277
Platinum/alumina
Dehydrocyclization controlling site in bifunctional reforming catalysts 331
Platinum/alumina
Dehydrocyclization controlling site in bifunctional reforming catalysts 337
Platinum/alumina–chlorine
Role of sulphur in catalytic reforming of hydrocarbons on platinum/alumina 259
Pore structure
Control of the porous structure of amorphous silica–alumina. V. The effect of compaction 249
Propanol conversion
Conversion of propan-2-ol on silica supported chromium oxide. II. Catalytic results 81
Propylene nitroxidation
Investigation of nickel oxide on alumina aerogel catalysts promoted with magnesia or iron oxide for nitroxidation of propylene into acrylo- and acetonitriles 209

Reforming catalysts
Role of sulphur in catalytic reforming of hydrocarbons on platinum/alumina 259
Reforming catalysts
Dehydrocyclization controlling site in bifunctional reforming catalysts 331
Reforming catalysts
Dehydrocyclization controlling site in bifunctional reforming catalysts 337
Regeneration
Effects of support on carbon formation and gasification on nickel during carbon monoxide hydrogenation 147
Regeneration
Vapor-phase aldol condensation of formaldehyde with propionic acid on vanadium pentoxide–phosphorus pentoxide 221

Selectivity
Synthesis of methanol. Part 1. Catalysts and kinetics 1
Selectivity
Chrysocolla as a methanation catalyst support 95
Selectivity
Optimum chlorine content on a commercially operated $Pt–Re/Al_2O_3–Cl$ catalyst as a function of the specific surface area 109
Selectivity
Liquid phase isomerization of $C_6–C_8$ alkenes on heteropolyoxometalates 127
Selectivity
Partial oxidation of methane catalyzed by H-mordenite and fluorinated mordenite 139
Selectivity
Effect of carbon deposits on carbon monoxide hydrogenation over alumina-supported cobalt catalyst 199
Selectivity
Investigation of nickel oxide on alumina aerogel catalysts promoted with magnesia or iron oxide for nitroxidation of propylene into acrylo- and acetonitriles 209
Selectivity
Vapor-phase aldol condensation of formaldehyde with propionic acid on vanadium pentoxide–phosphorus pentoxide 211
Selectivity
Kinetics and selectivity of deep catalytic oxidation of n-hexane and benzene 231
Selectivity
Role of sulphur in catalytic reforming of hydrocarbons on platinum/alumina 259
Selectivity
Transformation of $C_1–C_4$ alcohols into hy-

drocarbons on an amorphous silica–alumina catalyst 299
Selectivity
Hydrogenation of but-1-yne and but-1-ene on palladium catalysts. Particle size effect 307
Silica–alumina
Control of the porous structure of amorphous silica–alumina. V. The effect of compaction 249
Silica–alumina
Transformation of C_1–C_4 alcohols into hydrocarbons on an amorphous silica–alumina catalyst 299
Sintering
Synthesis of methanol. Part 1. Catalysts and kinetics 1
Sintering
Effect of catalyst preparation on catalytic activity. V. Chemical structures on nickel/alumina catalysts 163
Strontium oxide
Aldol addition of acetone, catalyzed by solid base catalysts: magnesium oxide, calcium oxide, strontium oxide, barium oxide, lanthanum (III) oxide and zirconium oxide 189
Sulphur
Role of sulphur in catalytic reforming of hydrocarbons on platinum/alumina 259

Temperature-programmed desorption
Comparative calorimetric studies of the acidity of zeolites by static and temperature-programmed methods of ammonia adsorption and desorption 323

Vanadium pentoxide–phosphorus pentoxide
Vapor-phase aldol condensation of formaldehyde with propionic acid on vanadium pentoxide–phosphorus pentoxide 221
Vanadium-phosphate
Spectroscopic study of the vanadium-phosphate catalyst used in the selective oxidation of n-butane to maleic anhydride 119
Vinyl acetate synthesis
Activity and deactivation of a catalyst for vinyl acetate synthesis in an industrial fluidized reactor 67

Zeolites
Comparative calorimetric studies of the acidity of zeolites by static and temperature-programmed methods of ammonia adsorption and desorption 323
Zinc acetate
Activity and deactivation of a catalyst for vinyl acetate synthesis in an industrial fluidized reactor 67
Zirconium oxide
Aldol addition of acetone, catalyzed by solid base catalysts: magnesium oxide, calcium oxide, strontium oxide, barium oxide, lanthanum (III) oxide and zirconium oxide 189

applied catalysis

AN INTERNATIONAL JOURNAL DEVOTED TO CATALYTIC SCIENCE AND ITS APPLICATIONS

VOL. 36, NO. 1–2 **CONTENTS** **JANUARY 15, 1988**

(Abstracts/Contents Lists published in API Abstracts/Catalysts & Catalysis, Chemical Abstracts, Current Contents/Physical, Chemical & Earth Sciences, Current Contents/Engineering, Technology & Applied Sciences, Engineering Index, Metals Abstracts, Science Citation Index, Theoretical Chemical Engineering Abstracts, Automatic Subject Citation Alert and SCISEARCH)

Editorial v

Synthesis of methanol. Part 1. Catalysts and kinetics (Review)
G.C. Chinchen, P.J. Denny, J.R. Jennings, M.S. Spencer and K.C. Waugh (Billingham, U.K.) 1

Activity and deactivation of a catalyst for vinyl acetate synthesis in an industrial fluidized reactor
T. Kawaguchi and T. Wakasugi (Osaka, Japan) 67

Conversion of propan-2-ol on silica supported chromium oxide. II. Catalytic results
M. Richter and G. Öhlmann (Berlin, G.D.R.) 81

Chrysocolla as a methanation catalyst support
Q.-C. Shi and J.L. Falconer (Boulder, CO, U.S.A.) and T.P. Chen (Wheatridge, CO, U.S.A.) 95

Optimum chlorine content on a commercially operated Pt–Re/Al_2O_3–Cl catalyst as a function of the specific surface area
J.M. Grau, E.L. Jablonski, C.L. Pieck, R.J. Verderone and J.M. Parera (Santa Fe, Argentina) 109

Spectroscopic study of the vanadium-phosphate catalyst used in the selective oxidation of n-butane to maleic anhydride
J. Čurilla and R. Domanský (Košice, Czechoslovakia) and B. Wichterlová (Prague, Czechoslovakia) 119

Liquid phase isomerization of C_6–C_8 alkenes on heteropolyoxometalates
V.S. Nayak and J.B. Moffat (Waterloo, Canada) 127

Partial oxidation of methane catalyzed by H-mordenite and fluorinated mordenite
S. Kowalak and J.B Moffat (Waterloo, Canada) 139

Effects of support on carbon formation and gasification on nickel during carbon monoxide hydrogenation
C.H. Bartholomew, M.V. Strasburg and H.-Y. Hsieh (Provo, UT, U.S.A.) 147

Effect of catalyst preparation on catalytic activity. V. Chemical structures on nickel/alumina catalysts
Y.-J. Huang and J.A. Schwarz (Syracuse, NY, U.S.A.) and J.R. Diehl and J.P. Baltrus (Pittsburgh, PA, U.S.A.) 163

(continued overleaf)

Contents (continued)

Effect of catalyst preparation on catalytic activity. VI. Chemical structures on nickel/alumina catalysts: their impact on the rate-determining step in the hydrogenation of carbon monoxide
Y.-J. Huang and J.A. Schwarz (Syracuse, NY, U.S.A.) 177

Aldol addition of acetone, catalyzed by solid base catalysts: magnesium oxide, calcium oxide, strontium oxide, barium oxide, lanthanum(III) oxide and zirconium oxide
G. Zhang, H. Hattori and K. Tanabe (Sapporo, Japan) 189

Effect of carbon deposits on carbon monoxide hydrogenation over alumina-supported cobalt catalyst
D.-K. Lee, J.-H. Lee and S.-K. Ihm (Seoul, Korea) 199

Investigation of nickel oxide on alumina aerogel catalysts promoted with magnesia or iron oxide for nitroxidation of propylene into acrylo- and acetonitriles
M. Rahman, R.J. Willey and S.J. Teichner (Boston, MA, U.S.A.) 209

Vapor-phase aldol condensation of formaldehyde with propionic acid on vanadium pentoxide–phorphorus pentoxide
M. Ai (Yokohama, Japan) 221

Kinetics and selectivity of deep catalytic oxidation of n-hexane and benzene
S.K. Gangwal, M.F. Mullins, J.J. Spivey, P.R. Caffrey and B.A. Tichenor (Triangle Park, NC, U.S.A.) 231

Control of the porous structure of amorphous silica–alumina. V. The effect of compaction
R. Snel (Pretoria, South Africa) 249

Role of sulphur in catalytic reforming of hydrocarbons on platinum/alumina
G.M. Bickle, J. Biswas and D.D. Do (St. Lucia, Australia) 259

Deactivation by coking of platinum/alumina catalysts. Effects of operating temperature and pressure
J. Barbier, E. Churin, P. Marecot and J.C. Menezo (Poitiers, France) 277

Microcalorimetric investigation of the interaction of carbon monoxide with coprecipitated cupric oxide–zinc oxide catalysts in well-defined oxidation states
E. Giamello, B. Fubini and V. Bolis (Turin, Italy) 287

Transformation of C_1–C_4 alcohols into hydrocarbons on an amorphous silica–alumina catalyst
R.A. Comelli and N.S. Figoli (Santa Fe, Argentina) 299

Hydrogenation of but-1-yne and but-1-ene on palladium catalysts. Particle size effect
S. Hub, L. Hilaire and R. Touroude (Strasbourg, France) 307

Comparative calorimetric studies of the acidity of zeolites by static and temperature-programmed methods of ammonia adsorption and desorption
A. Auroux, Y.S. Jin and J.C. Vedrine (Villeurbanne, France) and L. Benoist (Caluire, France) 323

Letters to the Editor

Dehydrocyclization controlling site in bifunctional reforming catalysts
J. Margitfalvi and S. Göbölös (Budapest, Hungary) 331

Reply to "Dehydrocyclization controlling site in bifunctional reforming catalysts"
V.K. Shum (Naperville, IL, U.S.A.) and J.B. Butt and W.M.H. Sachtler (Evanston, IL, U.S.A.) 337
